STRICTLY PRIVATE & CONFIDENTIAL

Chimgan-Beldersay Mountain Resort

An advanced-stage hospitality development opportunity

Tashkent Region, Republic of Uzbekistan

INVESTMENT MEMORANDUM · 2026

Strictly private and confidential. Provided for information purposes only. Does not constitute an offer, invitation or recommendation. All information is subject to independent verification and due diligence.

CONFIDENTIAL

Important Notice

This Investment Memorandum (the "Memorandum") has been prepared solely for information purposes to assist recipients in deciding whether to proceed with a preliminary evaluation of the opportunity described herein (the "Opportunity"), which is offered for sale by way of outright acquisition. It does not constitute, and should not be construed as, an offer, invitation or recommendation to enter into any transaction; any sale will be effected only under definitive transaction documentation.

The information herein has been provided by the current owners and their advisers and derives from sources believed to be reliable, including official cadastral and permitting documentation referenced in the Appendix. It has not been independently verified. No representation or warranty, express or implied, is made as to its accuracy or completeness. Certain figures are indicative or derived from third-party public sources and are identified as such.

Statements regarding development potential, operating models and financial parameters are illustrative and do not constitute forecasts, projections or guarantees. Any transaction will be subject to contract, satisfactory due diligence and applicable regulatory approvals. Recipients should conduct their own investigations and take their own professional advice. By accepting this Memorandum, the recipient agrees to keep its contents confidential.

01

OVERVIEW

Executive Summary

The Opportunity comprises a **~18.08-hectare advanced-stage hospitality development** in the Chimgan–Beldersay mountain tourism corridor of Tashkent Region, Uzbekistan, approximately 90 km from Tashkent.

Site aerial - hotel frame (upper right), cottage rows and mature landscape within the ~18.08 ha holding.

Unlike a greenfield site, the asset carries a substantial, cadastrally registered construction base: a 7,935 m² reinforced-concrete hotel structurally topped out across all six intended floors, together with eight townhouse blocks, ten cottages, a standalone restaurant, a gatehouse and associated amenity structures, an aggregate of ~16,015 m² of registered building area already in place.

The asset sits within a corridor the Government of Uzbekistan has designated for large-scale, internationally financed resort development, adjacent to the operating Amirsoy resort and the state-backed Beldersay-Chimgan-Nanay all-season programme. It is offered against a backdrop of record national tourism growth - 10.7 million foreign visitors in 2025, up 73% on 2019.

The current owners are seeking a sale of the asset by way of outright acquisition.

TRANSACTION SUMMARY	
ASSET	Advanced-stage mountain resort, Chimgan–Beldersay corridor
LOCATION	Chimgan MFY, Bo‘stonliq District, Tashkent Region · ~90 km from Tashkent
SITE AREA	~18.08 ha (allocated within a larger registered holding; subdivision in progress)
REGISTERED BUILDING AREA	~16,015 m² across ~40 registered structures
HOTEL	7,935 m² GFA · ~100 keys · 6 storeys + basement · frame topped out
INDICATIVE ASKING PRICE	US$30 million
ESTIMATED COMPLETION CAPITAL	~US$19 million (for the acquirer’s account)
TRANSACTION STRUCTURE	Sale, share or asset deal, to be agreed
PROCESS	Subject to NDA and due diligence

Investment Highlights

- **Institutional scale, advanced stage.** ~18 ha with ~16,015 m² of registered, built structure, the capital-intensive, least-reversible phase (foundations and superstructure of the anchor hotel) is complete.
- **De-risked hotel frame.** The six-storey reinforced-concrete hotel is structurally topped out; envelope, MEP and fit-out remain.
- **Registered title, clean encumbrance position.** ~40 buildings registered as freehold; no mortgage, lease, servitude or restriction recorded as at 4 March 2026.
- **Documented approval chain.** Regional Hokim decision, Architectural-Planning Assignment (APT) and State Construction Oversight registration for a health/wellness complex.
- **Existing utilities basis.** Electricity, water and gas technical conditions established; on-site water and power infrastructure installed.
- **Corridor tailwind.** Government-designated resort corridor; French-designed, part French-financed Beldersay-Chimgan-Nanay programme; €100m+ Amirsoy resort already operating nearby.
- **Optionality for the acquirer.** Unpartitioned upper floors allow operator-led configuration; the asset supports multiple operating models and onward exit routes for a purchaser.

02

RATIONALE

Investment Thesis

The Opportunity represents one of the largest privately controlled, advanced-stage hospitality development sites within Uzbekistan's flagship mountain tourism corridor. The thesis rests on five reinforcing pillars.

1 Scarcity of advanced-stage product in a designated growth corridor

The corridor is the object of a government-backed, internationally financed all-season resort programme, yet branded, institutional-grade mountain hospitality supply remains limited. A privately held ~18 ha site carrying ~16,015 m² of registered structure is not readily replicable, comparable positions would require multi-year land assembly, permitting and construction.

2 Execution risk already substantially absorbed

The anchor hotel's reinforced-concrete frame is topped out across all six floors. The phase that consumes the most time and capital, and carries the greatest technical and permitting risk, has been completed and cadastrally registered. The remaining scope, envelope, services, fit-out, is more predictable and more readily financed.

3 Title and approvals are documented, not asserted

The buildings are registered as freehold; the land is held under a permanent-use right; and the development is supported by a documented chain of state approvals for a health/wellness complex. This materially reduces the legal diligence burden relative to typical emerging-market development sites.

4 Demand fundamentals are strong and structural

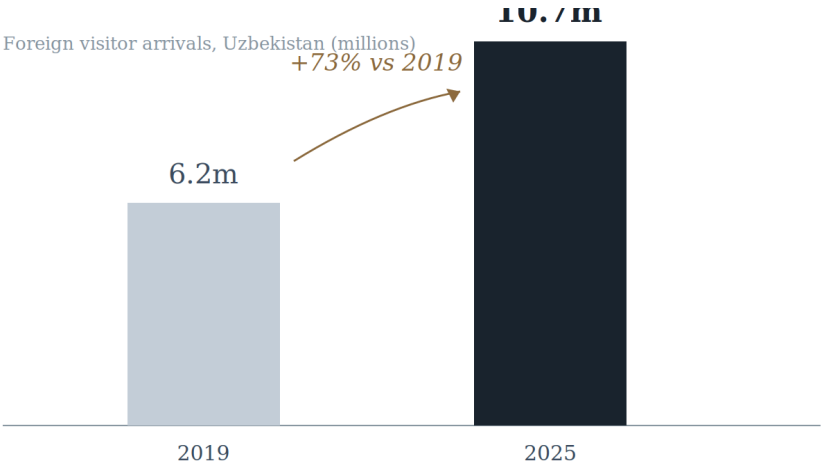

National inbound tourism reached a record 10.7 million in 2025 (up 73% on 2019), with lengthening stays and rising per-visitor spend; the corridor benefits from both this international growth and a large domestic leisure market within ~90 km of the capital.

5 Multiple routes to value for an acquirer

For a purchaser, the asset supports several operating models and can be completed in phases, with onward value available via stabilised-asset sale, operator or brand introduction, residential component sell-down, or whole-asset trade.

Uzbekistan Overview

Since 2017 Uzbekistan has pursued a sustained programme of economic liberalisation, currency reform and investment-climate improvement. For international capital, the relevant headline is the combination of reform momentum and a tourism sector expanding faster than almost any in the world.

KEY REFERENCE POINTS

- Record inbound tourism. 10.7 million foreign visitors in the first eleven months of 2025, surpassing the national 10-million target and generating approximately €3.74 billion in tourism service exports.
- Among the world's fastest-growing destinations. Ranked by UN Tourism among the ~7 fastest-growing inbound markets for Jan–Sep 2025, with arrivals up 73% versus 2019.
- Sustained monthly momentum. From April 2025, Uzbekistan exceeded one million visitors every month for the first time.
- Deeper engagement. Average length of stay rose from ~4-5 nights to 7-9 nights, improving the revenue base for accommodation-led assets.
- Policy support. Visa liberalisation, international promotion and government prioritisation of resort infrastructure.

04

DEMAND

Tourism Market

Uzbekistan’s tourism expansion is broad-based rather than concentrated in a single segment - supporting a mountain resort positioned for both international and domestic demand.

VOLUME & GROWTH

Record 2025 arrivals and one of the strongest post-2019 recoveries globally, underpinned by consistent policy support and international promotion.

SOURCE MARKETS

Regional neighbours account for the largest share, with rapid growth from China following targeted promotion and "Tourism Years" campaigns.

DOMESTIC LEISURE

A large and growing domestic market, material for a resort within ~90 km of Tashkent, supporting midweek and shoulder-season demand and year-round utilisation.

EMERGING HIGH-VALUE SEGMENTS

Rising interest in wellness, nature-based and mountain tourism aligns directly with this asset’s positioning; the corridor is explicitly promoted for all-season, nature-led recreation.

STRATEGIC IMPLICATION

An accommodation-led mountain asset is positioned against both the international growth curve and a deep domestic base, a combination that supports year-round operation rather than a single ski season.

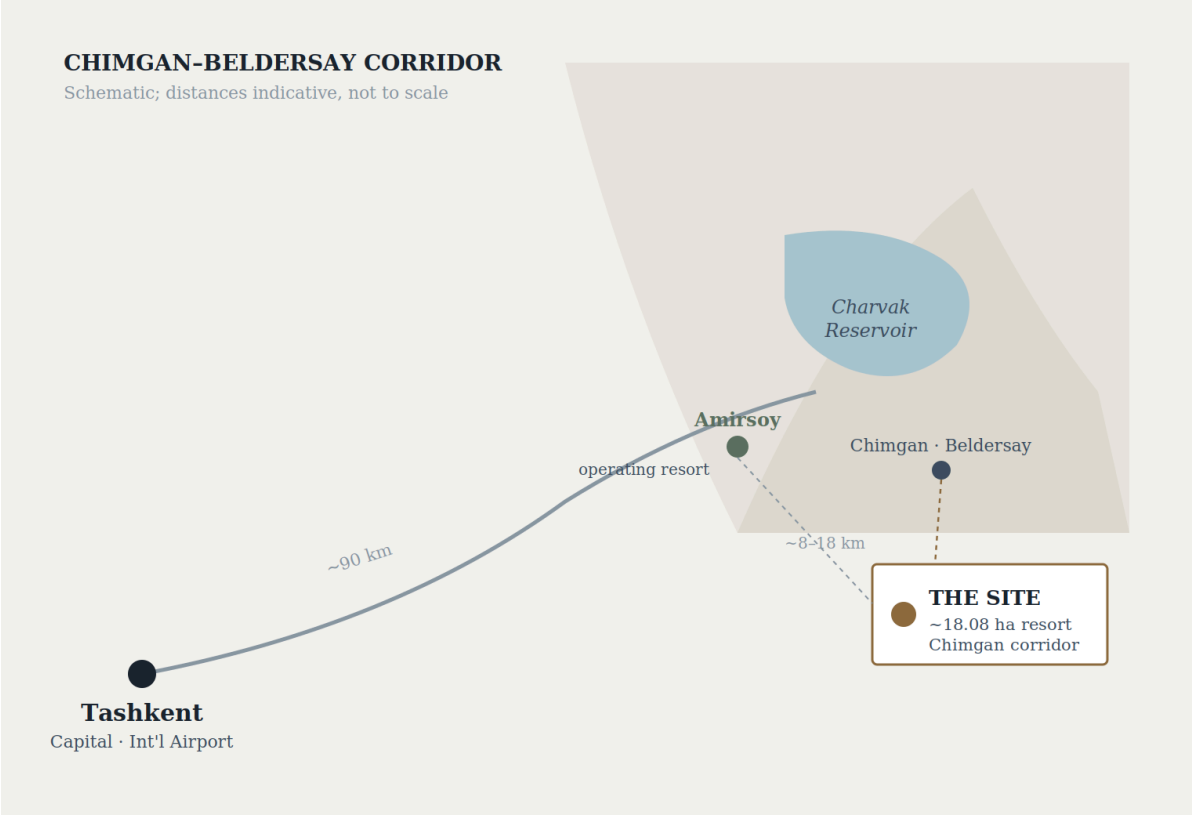

Source-market figures: National Statistics Committee, Jan–Aug 2025.

05

LOCATION

The Chimgan–Beldersay Corridor

The corridor sits in the Western Tian Shan (Chatkal Range) around the Charvak reservoir - historically Uzbekistan's principal mountain-recreation area and now the focus of concentrated state and private investment.

Schematic corridor context. Distances indicative, not to scale.

GOVERNMENT-DESIGNATED RESORT CORRIDOR

The official government tourism portal lists Amirsoy, Chimgan and Beldersay among Bo'stonliq's resorts. The area is the subject of an integrated development programme for the Bo'stonliq district.

BELDERSAY–CHIMGAN–NANAY ALL-SEASON RESORT PROGRAMME

A state-backed international resort project run through a dedicated State Unitary Enterprise Project Office. Its master plan and economic model were developed by a French consortium; the French firm Montagne et Neige Développement (MND) was selected to construct all-season resort facilities, with financing structured to include the French Treasury alongside foreign direct and local investment. The programme is a multi-hundred-million-dollar, French-designed and part French-financed state initiative.

HIGH-ALTITUDE CABLE-CAR INFRASTRUCTURE

The programme envisages cable cars rising to 3,309 m, described as the highest cable-car point in Central Asia, with an intermediate station at ~2,515 m, and capacity for around 6,000 tourist places.

AMIRSOY — PROOF OF INSTITUTIONAL CAPITAL

The nearby Amirsoy Mountain Resort opened in December 2019 on ~900 ha with €100 million+ of investment, professionally designed and managed, and has a funded expansion intended, over time, to link Amirsoy, Beldersay and Chimgan into an interconnected ski domain of ~100 km. Amirsoy lies roughly 8–18 km from Chimgan. It is the corridor's clearest evidence that international-standard capital and operators are already committed.

SEA BREEZE UZBEKISTAN

A separate large-scale international tourist centre planned on the Charvak reservoir shore, its master plan (developed with foreign companies) reviewed at head-of-state level in April 2025 - a further indicator of the scale of investment gravitating to the immediate area.

06

ACCESS

Location Analysis

TASHKENT CITY	~90 km
TASHKENT INT'L AIRPORT	~90 km · ~1.5–2 hrs
AMIRSOY MOUNTAIN RESORT	~8–18 km
CHARVAK RESERVOIR	Immediate corridor
CHIMGAN SKI AREA	Adjacent

The site in its setting - boundary road, mature tree cover and mountain backdrop.

POSITIONING

The site occupies elevated, wooded ground within the established Chimgan settlement, fronting a boundary road with mains-serviced infrastructure and neighbouring community facilities. Its position ~90 km from a capital-city catchment of several million people underpins the year-round, dual-market demand case.

COMPETITIVE POSITIONING

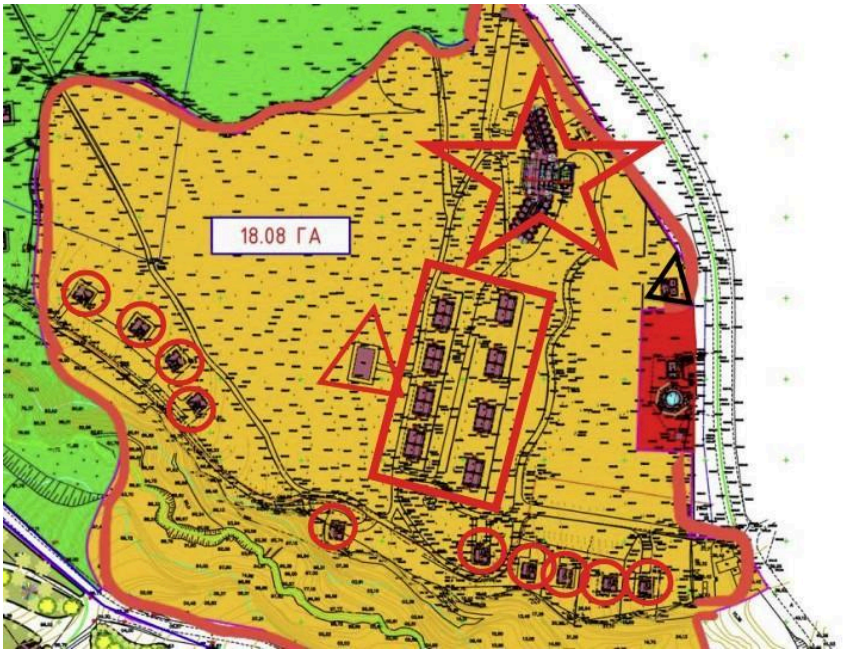

Existing corridor accommodation is dominated by smaller guesthouses, chalets and mid-scale hotels (typically tens of keys). A completed ~100-key hotel with villa and townhouse components would occupy a scale and quality position that is currently thinly supplied.

07

THE ASSET

Asset Overview

A master-planned resort site of ~18.08 ha, organised around an elevated anchor hotel with a townhouse enclave, a cottage row, a standalone restaurant and a controlled gated entrance.

Annotated site plan (18.08 ha): hotel (upper), townhouse enclave (rectangle), cottage row (circles), restaurant & gatehouse.

SPATIAL ORGANISATION

- **Hotel** - elevated, set back from the eastern boundary road, anchoring the upper (north-east) portion.
- **Townhouse enclave** - eight blocks arranged in rows, central-south.
- **Cottage row** - ten detached cottages aligned beneath the townhouse enclave.
- **Standalone restaurant** - central-western position.
- **Gatehouse (KPP)** - controlling access at the eastern entrance.
- Mature tree cover; partial internal roads and pedestrian works.

REGISTERED BUILDING SCHEDULE

COMPONENT	UNITS	STOREYS	AREA (EACH)	STATUS
Hotel	1	6 + basement	7,935 m²	Frame topped out; roof, envelope, MEP, fit-out remaining
Townhouse blocks	8	2	396 m²	Shell-and-core; serviced; internal electrical pending
Cottages	10	3 (incl. terrace)	~200 m²	4 exterior complete; 6 at frame stage

Standalone restaurant	1	—	—	Design / early stage - to be confirmed
Gatehouse (KPP)	1	2	~76 m²	Built
Ancillary structures	several	—	88-204 m²	Registered
Total registered			~16,015 m²	Per State Register, 04.03.2026

Aggregate registered building area independently corroborates the hotel (7,935 m²) and townhouse (396 m²) figures against the State Register extract.

08

SUBSTANCE

Existing Construction Base

The core of the advanced-stage argument. Each statement below is supported by architectural working drawings (stage RP), the cadastral extract and site photography.

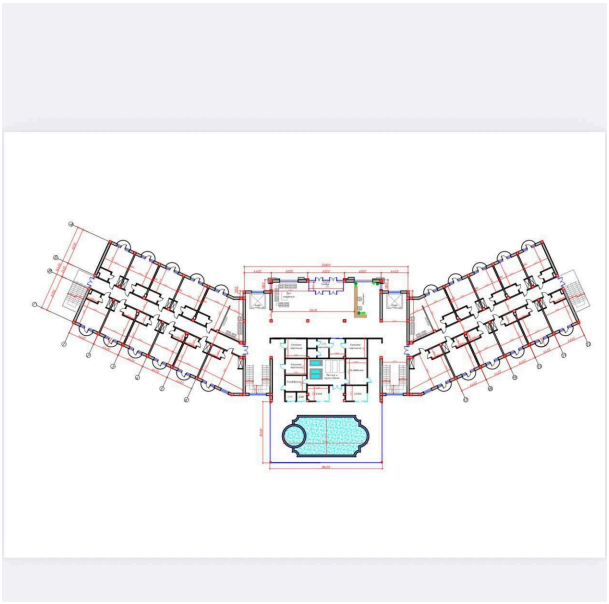

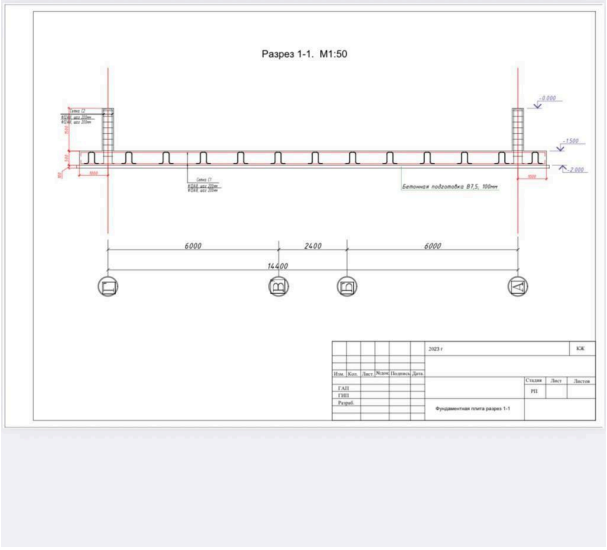

The hotel: reinforced-concrete frame topped out across all six floors, chevron plan, on the elevated north-east of the site.

The hotel

A reinforced-concrete framed building of 7,935 m² over six floors plus a basement (–1) for plant, boiler and maintenance. The plan is a symmetrical chevron: two guest-room wings splayed from a central spine housing twin lift-and-stair cores, founded on a mat/raft foundation (structural set stamped 2023). The structure is topped out at full height - all six floors cast, with the sixth (restaurant) floor accessible; the remaining structural item at the top is the roof**.** Floor-to-floor is approximately 3 m before finishes.

The ground floor accommodates reception, a medical block adjacent to the reception wall, and a wellness/spa cluster (~200 m², designed as a hotel extension) with an outdoor pool to the rear. Upper floors are currently unpartitioned open floor-plate, allowing a future operator to set room sizes, mix and key count - indicatively ~100 keys at ~15-20 m² per room, with scope to reconfigure to larger rooms.

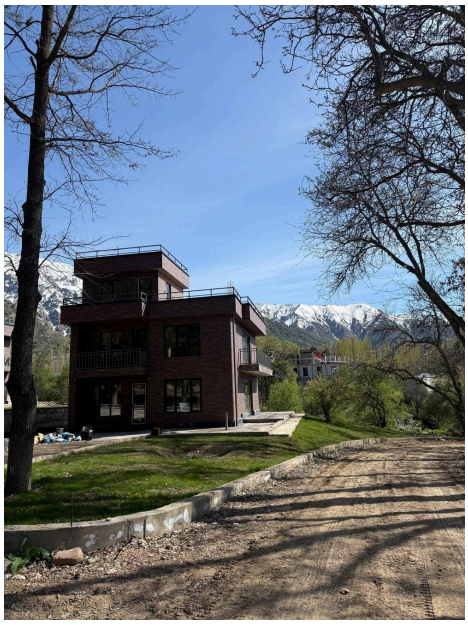

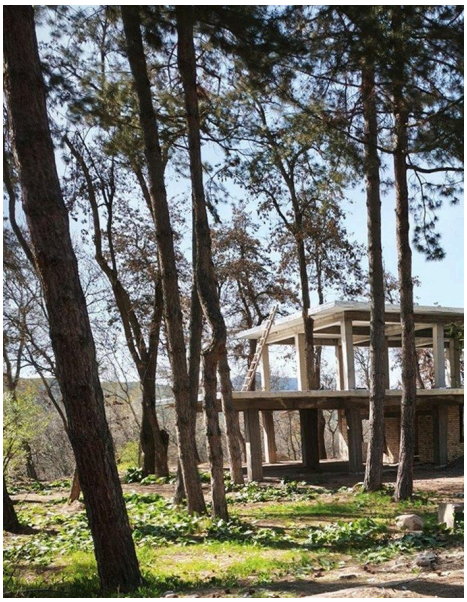

Ground floor plan (lobby, wellness cluster, rear pool) and foundation section (stage RP, 2023).

Townhouses & cottages

Townhouses. Eight two-storey blocks of 396 m² each, currently at shell-and-core stage, connected to services with internal electrical works outstanding.

Cottages. Ten detached cottages of ~200 m² each (three levels including a roof-terrace level per the architectural set). Four have completed exteriors; six remain at frame stage. All connected to services; internal electrical pending. Documented finish specification includes ceramic tile, marble plinth, curtain-wall glazing, facing brick and MDF/aluminium joinery.

Completed cottage exterior (brick, glazing, roof terrace) and a two-storey shell among mature pines.

Terraced blocks at shell-and-core stage — arched-bay façades, structure complete, envelope and fit-out to follow.

Utilities & engineering

Per the Architectural-Planning Assignment (APT) technical conditions: electricity (110/10 kV; connection referenced at substation "12-Buloq", 10 kV feeder), water (via the Chimgan-Chorbog recreation-zone inter-district water administration) and gas (Bo‘stonliq-tumangaz). On-site installed infrastructure is reported to include a water well (~5 m³/hr), two electrical feeder lines and a temporary 250 kVA transformer.

Design intent

Architectural renderings depict a contemporary mountain-resort treatment - full-height glazing, balconied rooms, a glazed rooftop restaurant and landscaped pool. These are presented as *design intent / concept*, not as-built.

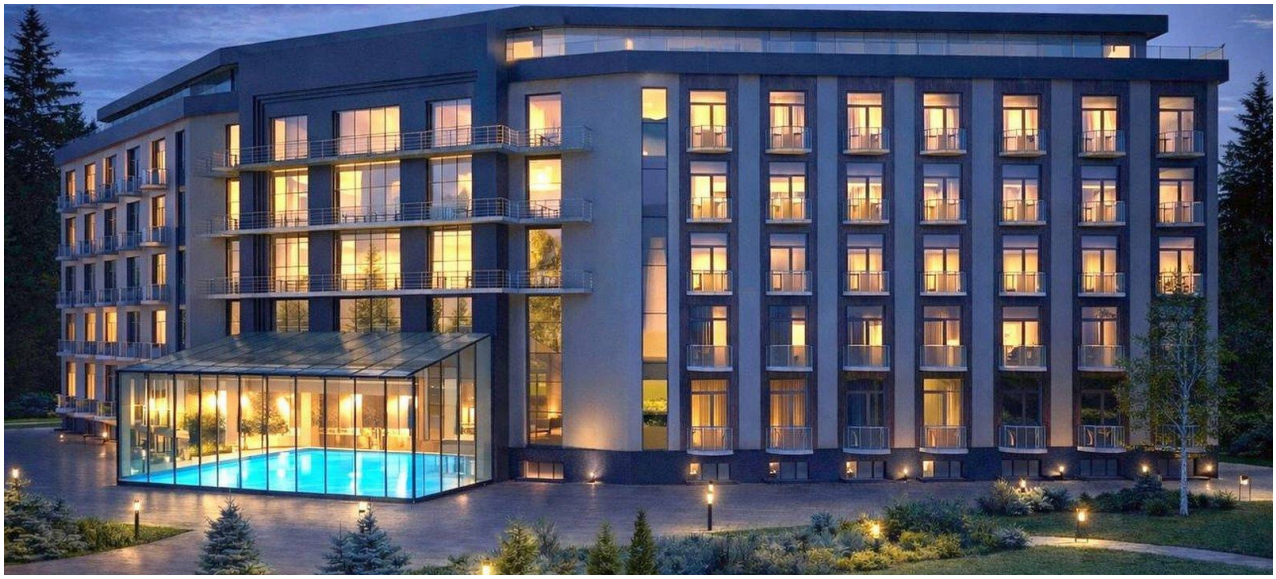

Hotel — design intent (concept, not as-built).

09

OPTIONALITY

Development Potential

The asset's scale, mix and unpartitioned hotel floor-plates support several operating models for an acquirer. These are illustrative positioning options, not recommendations.

Design intent — contemporary mountain-resort treatment (concept, not as-built).

MODEL	DESCRIPTION
Branded four-star hotel	Complete the ~100-key hotel under an international operator or brand, with villas and townhouses as keyed or residential inventory.
Wellness / medical-spa resort	Leverage the registered health/wellness use-class, spa block and medical block into a wellness-led product, consistent with rising wellness-tourism demand.
Mixed-use + branded residences	Operate the hotel while selling or renting townhouses and cottages as branded residences, accelerating capital recovery.
Phased delivery	Complete and open the cottages and hotel first, with townhouses and the standalone restaurant/event venue in later phases.

Standalone restaurant / event venue - design concept.

POSITIONING

Market Opportunity

SUPPLY GAP

Corridor accommodation is largely smaller-scale; branded, institutional-quality product at ~100 keys plus villas is thinly supplied.

DEMAND DRIVERS

Record national arrivals, lengthening stays, a large domestic catchment, and government-led corridor investment.

ANCHOR COMPARABLES

Amirsoy (€100m+, operating) demonstrates both demand and the willingness of international capital and operators to commit to the corridor.

BRANDING POTENTIAL

Scale and quality sufficient to attract an international operator or brand, subject to completion to standard.

NET

A completed, branded ~100-key resort with villas would occupy a scale-and-quality position that is currently under-supplied in a corridor attracting concentrated public and private investment - the essence of the value case for an acquirer.

ECONOMICS

Financial Overview

High-level indicative economics only. No detailed model; all figures indicative and subject to due diligence. Operating projections are reserved for the management-presentation stage.

US$30m	~US$19m	~US$49m
ASKING PRICE	EST. COMPLETION CAPITAL	INDICATIVE ALL-IN BASIS

ASKING PRICE	US$30 million
ESTIMATED COMPLETION CAPITAL	~US$19 million (for the acquirer's account)
INDICATIVE ALL-IN BASIS	~US$49 million (acquisition + completion)
REGISTERED BUILDING AREA	~16,015 m²
SITE AREA	~18.08 ha
INDICATIVE ALL-IN PER REGISTERED M²	~US$3,060 / m² (all-in basis ÷ registered area)
INDICATIVE ALL-IN PER HOTEL KEY	~US$490,000 / key (all-in basis ÷ ~100 keys, whole-asset)
INDICATIVE LAND BASIS	~US$1.66m / ha (asking ÷ 18.08 ha, before buildings)

Derived cost/basis metrics are indicative and provided for scale only; they are not valuations. All-in per-key figure allocates whole-asset cost across hotel keys for illustration and is not an isolated hotel cost. Independent valuation and a full development budget are due-diligence items.

Transaction Opportunity

OWNERSHIP STRUCTURE

The site and its registered buildings are held by Hydrolife Bottlers LLC (registered title-holder). The development was carried out by RAKE NUR LLC, the sister development company under common beneficial ownership, which is the entity named on the Architectural-Planning Assignment and construction-registration documents. The two entities share a common owner.

TITLE & LAND

The land (registered parcel 11:03:42:01:03:0220/0002) is held under a permanent-use right; the buildings are registered as freehold. The project's ~18.08 ha is allocated within a larger registered holding, with cadastral subdivision in progress. As at the State Register extract dated 4 March 2026, no mortgage, lease, servitude or restriction was recorded against the assets.

EXCLUDED ASSETS

The Hydrolife water-bottling operation and the neighbouring mosque both sit outside the ~18.08 ha and are not part of the Opportunity.

INDICATIVE TERMS

The owners are offering the asset for sale by way of outright acquisition. Asking price US$30 million; estimated completion capital ~US$19 million (for the acquirer's account); transaction structure (share or asset deal) to be agreed; process subject to NDA and due diligence.

> **LIKELY STRUCTURE**
>
> Given Uzbek land tenure (a permanent-use right rather than freehold land), the transaction is most naturally effected as a share acquisition of the title-holding entity, ring-fenced to the resort perimeter, so that the land-use right and registered buildings transfer cleanly and the excluded bottling assets are carved out. Asset-deal alternatives can be discussed.

Key due-diligence items

Presented openly to assist the buyer's advisers. Each is a standard item to be addressed in diligence and documentation.

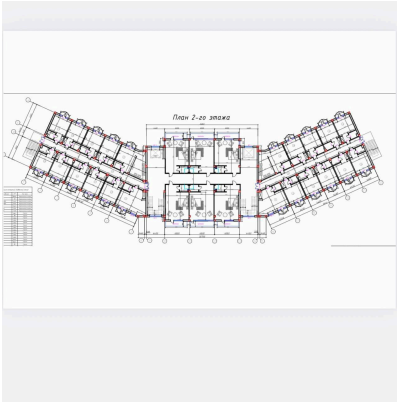

#	ITEM
1	Completion of cadastral subdivision of the ~18.08 ha from the larger registered parcel.
2	Confirmation of land-use-right transferability and treatment of foreign ownership (share vs asset structure).
3	Alignment of the registered land category ("other-purpose lands") with the approved health/wellness resort use.
4	Ring-fencing of the resort assets from the bottling operation within the title-holding entity.
5	Confirmation of the clean-title / no-encumbrance position as current at completion.
6	Structural condition survey of the exposed hotel frame; utilities capacity confirmation.

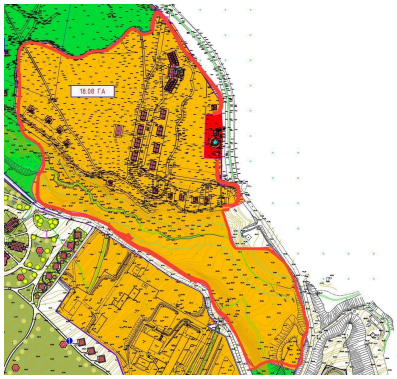

Documented approval chain

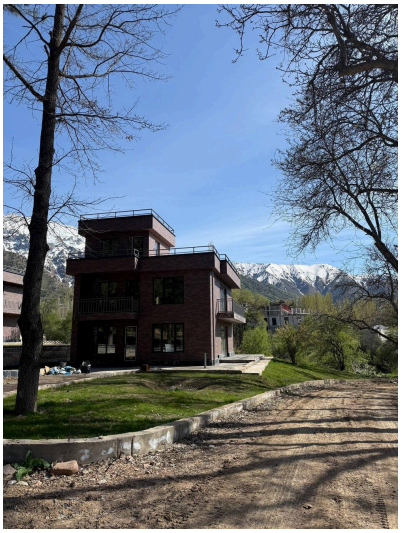

GOVERNING AUTHORISATION	Tashkent Region Hokim decision No. 346 (11 May 2018)
PLANNING ASSIGNMENT	Architectural-Planning Assignment (APT) No. 153-B-t/18
CONSTRUCTION REGISTRATION	State Construction Oversight Inspection (GASN), 2023
REGISTERED USE	Health / wellness complex (Оздоровительный комплекс)
TITLE REFERENCE	State Register extract R-BOST47904110, 04.03.2026

REFERENCE

Appendix

Hotel typical floor plan (RP); cadastral site plan (18.08 ha); completed cottage exterior.

APPENDIX CONTENTS

	CONTENTS
A	Construction photography - hotel frame, cottages, townhouse shells, site aerial
B	Architectural drawings - hotel plans, foundation section, cottage/townhouse working-drawing extracts (stage RP)
C	Site & location plans - annotated site plan; corridor and location maps
D	Title & permitting references - State Register extract (04.03.2026); APT 153-B-t/18; construction-commencement registration (2023); Hokim decision 346/2018 (released under NDA in the data room)
E	Supporting market statistics - sources for tourism and corridor data

NEXT STEPS

Interested parties are invited to execute a non-disclosure agreement, following which the data room, including full title, permitting and construction documentation, will be made available, and a management presentation and site visit can be arranged.

Strictly private and confidential. This Memorandum does not constitute an offer or recommendation. All information is subject to independent verification and due diligence. © 2026. All rights reserved.
